

THE EXTRUDER/FEEDER

A CONTINUOUS HYDRO-FEED AUGER SYSTEM FOR INCINERATION

innovative waste processing systems

MATERIALS PROCESSED:

- Animal Carcasses
- Coarse Waste
- Resins
- Tars
- Filter Cake
- Soils
- Rocks
- Asphalt
- Overpacks
- Drums
- Supersacs
- Polymers
- Paint Sludge
- Tyvek Suits
- Clay
- Wood Waste
- Plastic Pieces
- Concrete
- Organic Waste

* Some material can only be processed in larger units.

UTILIZATION BY:

- Energy Recovery Systems (Industrial, Utilities, etc.)
- Incineration Operations
- Heavy Industrial Applications
- Hazardous and Low Level Radioactive Facilities
- Governmental Contracts (weapon destruction, low grade radioactive contaminated material reduction)
- OEM (manufacturers of rotary kilns and fluidized bed)
- Medical Waste Sterilization Systems

BENEFITS:

- Shred/ Feed single step (larger models only)
- Variable feed rate (less than 1 rpm possible)
- Compression Auger create material plug to reduce burn back and leakage
- Batch infeed/continuous output
- Increased incineration efficiency - increased throughput
- Unique design tolerant of tramp material
- Low-speed, high-torque, low-horsepower design
- Compact design - reduced footprint requirement

Optional accessories -- see reverse side

Model EFA -1-100 with optional sealed rotary isolation gate, stainless steel water cooled feed tube, cover plates and doors.

Model EFG-1-150 ideally suited for this sludge pond clean-up

Model FB-1-20 with isolation gate

Model EFG-1-150 with optional guillotine isolation gate and special feed hoppers.

Dupont's model HFG-1-100 processing plastics

Easy to Maintain Screw Auger

The KOMAR extruder/feeder provides a wide spectrum of feeding capability with variable feed rate (PLC controlled) and continuous output. The compression auger offers the ability to produce a plug to prevent burn back potential and reduce air leakage. The unique design handles waste with varying physical and chemical characteristics including: solids and sludges with high and low Btu and literally thousands of different compounds. A blend of material is ideally suited for this type of feeder.

Optional Accessories

- Service Platform
- Fire Suppression System
- Custom Designed Support Stand
- Elevator
- Video Monitoring
- Electronic Oxygen Monitoring
- Nitrogen Purging
- Water Cooled Extrusion Tube
- Isolation Gates
- Airlock Chambers
- Skip Hoist
- Conveyors
- Enclosure Cover & Doors
